Green and Pickous counties, Alabama; and Lowndes and Mouroe counties, Mississippi. These Bonds were issued by these counties, severally, to ald said company in the construction of their road. They are known to be five of the wealthlest counties in either the State of Alabama or Mississippi. Having suffered but little by the ravages of the late war, they owe no floating debt, and possess a large taxable property, and the Bonds now offered constitute their only bonded debt. They are all 5 per cent. Coupon Boods, and pay their Interest semi-annually at the office of the Company, or in New York. The taxes have been already assessed in all the counties to meet the interest and provide a sinking fund for their restemption. These laxes have been regularly collected, and the interest in every case promptly paid, Grandians and courts intrusted with the moneys of orphana, can find no securities as fer and interest in every case promptly point. Goactiians and courts intrusted with the moneys
of orphans, can find no securities safer and
more profitable, and capitalists seeking to
make permanent investments can do no betfer than to purchase them. The Company
will dispose of them at such rates as will
make them a paying ten per cent. investment; and when the Bond is paid, ine purchaser will receive twenty-five per cent. additional on the original outlay. Stocks in
companies always depend on their management and rood fortune for their regular dividends. The income from the Bonds is certain, regular, more reliable, and, in most
lustances, more profitable.
